

## What is Beacon Central Billing it and how does it work?

Beacon Central Billing is a business solution whereby we collect all your monthly Beacon supplier invoices and consolidate them into one total amount. We collect this one amount from you by direct debit and then make payments to your suppliers on your behalf.

Everything we do at Beacon is geared to making your business life easier, leaving you with more time. Did you know you had a dedicated Beacon Central Billing Advisor?

Your advisor, as part of Beacon's Central Billing Team is here to work hard on your behalf to query invoices, request credits and manage disputes as quickly as possible as part of our dispute resolution service.

## Seven easy steps to supplier payments through Beacon Central Billing
